Purpose

The purpose of this guide is to assist users on how to incorporate ORCAXML into their applications. This document explains the design, elements, and functionality of ORCAXML. It is assumed that the user is familiar with Webservices standards and the terminologies associated with it.

Background

ORCAXML is a B2B (Business to Business) web application that receives user-customized requests for ORCA information from a client application on one or multiple records and returns the requested data in real-time using the XML format. The transaction is sent using SOAP or HTTPS POST technology and is encrypted via SSL.

XML Guidance provided in IAE Standard Transactions Version2 was followed while designing ORCAXML. More information regarding IAE Standard Transactions can be found at "http://www.acquisition.gov/std_transactions.cfm".

Users are authenticated in ORCAXML by passing a User-ID and Password along in the XML transaction. ORCA records are requested using DUNS/DUNS+4 only.

The client application that interacts with ORCAXML is to be written by the client's company or organization. This documentation aids in the construction of that client application.

ORCAXML allows customers to do a real-time user-customized request for information on a single or a small set of ORCA records for each transaction, and return that information back to the user in only a couple of seconds. For example, an end user could use ORCAXML to retrieve the most current Reps and Certs information for a particular record of interest. (This feature is available during both off-peak and peak hours. The quickness of the transaction is dependent on the amount of ORCA records and data requested per transaction.)

ORCA XML request/response is primarily based on individual provisions. ORCAXML response consists of data in three different forms. Users have a choice of choosing one or all of the forms mentioned in their XML request:

- **HTML Output:** All certification data in HTML format (both static text and vendor responses). Users do not have an option to choose individual provisions.
- **PDF Output:** All certification data in PDF format (both static text and vendor responses). Users do not have an option to choose individual provisions.
- **Text based output:** General Information about the vendor and their responses for provisions in text format. Static text is not included. Data corresponding to their respective XML tag names is included. Vendors have an option to pick single or multiple provisions.

ORCAXML Request:

Building a Client Application:

In order to communicate with the ORCA server you need to build a REST (Representational State Transfer) HTTPS POST or SOAP client web application:

1. In your application, dynamically create a string of XML data referred to as **ORCAXMLRequest**, that is based upon the ORCA records and information you want returned.
2. Take the ORCAXMLRequest and put it into a HTML form field named 'ORCADATA'.
Your client web application will then do a HTTPS POST to the URL that will be provided along with your userid/password.
3. The ORCXML server will receive your ORCAXMLRequest and then respond back to your client web application with XML referred to as **ORCAXMLResponse** to complete the transaction.
4. Your client application can then take the ORCAXMLResponse and input it into your XML parser to extract the data from it.

ORCAXMLRequest (Client XML)

This is the XML sent to the ORCAXML server. The ORCAXML Request is split up into three different groups (Identification, ORCARecords, and RequestedData) that are discussed in detail below.

1. Identification

The first section of ORCAXMLRequest is Identification. All of this information is mandatory. This is where the user enters the UserID and Password that they obtained from ORCA Helpdesk.

More information about how to obtain the userid and password can be found from the ORCAXML Documentation menu or from ORCAXML FAQs.

Element Name	Description
<Userid>	Userid issued to the client application
<Password>	Password associated with the userid

2. ORCARecords

The following Core and Optional elements are used to identify the requested ORCA record.

a. Core Identifier

- DUNS Number
Every XML request must consist of a single DUNS number. Multiple requests are to be submitted if multiple records are needed.
- Record Type (Current, Archived, Current+Archived)

b. Optional Identifiers

- DUNS Plus4
ORCA treats the combination of DUNS and DUNS Plus4 as the unique key to identify a Reps and Certs record. If DUNS Plus4 is left blank, 9 character DUNS number will be used to search ORCA database.
- Start Date
- End Date

These elements are used to request ORCA records that were submitted within a specific date range. These elements are optional, except when requesting archived records. If they are not included in the XML request file, only the current record for that DUNS number will be returned.

Requests for "Archived Only" or "Current+Archived", where <CertRegistrationStatusCode> equals to 2 or 3, require date values for the optional fields <CertRegistrationStartDate> and <CertRegistrationEndDate>.

Element Name	Description	Max Length of Allowable Characters
<DUNSID>	9 digit DUNS Number of the vendor	9
<DUNSPlus4ExtensionID>	4 character DUNS Plus4 of the vendor	4
<CertRegistrationStatusCode>	Record Type (Current or Archived or Current+Archived) Possible Values: 1- Current Only 2- Archived Only 3- Current+Archived	1
<CertRegistrationStartDate>	Start Date for Registration date range	10 (MM/DD/YYYY)
<CertRegistrationEndDate>	End date for Registration date range	10 (MM/DD/YYYY)

3. Requested Data Elements

RequestedData elements comprise the groups of data that may be requested during an XML transaction. Valid XML request values are Y (Yes) or N (No). ORCAXML output data is divided into the following two groups.

a. General Info

General Info consists of elements that represent the basic information about the vendor at the time of submission of their reps and certs record. The majority of these elements are not part of provisions that constitute reps and certs. All general info elements are derived from CCR data except for certification point of contact, certification submission and expiration date information.

Element Name	Description	Max. Length of characters
<Organization>	Consists of Elements related to Organization that includes DUNS Number, DUNS Plus4, CAGE Code, Legal Business Name Doing Business As, and Operations Start Date	1 (Y or N)
<Address>	Consists of elements related to address of the vendor	1 (Y or N)
<ContractorCertContact>	Consists of elements related to ORCA Certification Point of Contact.	1 (Y or N)
<CertRegistrationDateTime>	Date and time on which the record was submitted by the vendor	1 (Y or N)
<CertExpirationDateTime>	Date and time on which the record is set to expire	1 (Y or N)

b. FAR Provisions

This group consists of all the individual provisions that constitute reps and certs in ORCA. Users may request data for vendor responses (no static text) for one or more individual provisions but not specific elements within a provision. Users may also request complete reps and certs data both static and vendor responses, in either HTML or PDF formats.

Element Name	Description	Max. Length of characters
<HTMLURL>	Copy of complete Reps and Certs in HTML format.	1 (Y or N)
<PDFURL>	Copy of complete Reps and Certs in PDF format.	1 (Y or N)
<FAR522032>	Vendor response(s) for the provision FAR 52.203-2	1 (Y or N)

ORCAXML Output

This section discusses the ORCAXML response elements that are returned from the result of an XML transaction. As mentioned earlier, ORCAXML output will be based on provisions in accordance with most of the contract writing systems that store vendor responses for provisions. It will be easy to map data from XML output directly into an existing database.

ORCAXML response is divided into two sections:

1. Transaction Information

ORCAXML output always returns the <Transaction> Group, which contains the <TransactionStatus> and <TransactionMessages> elements. Since the status returned in the <TransactionStatus> element determines the outcome of the request, users are advised to inspect the value.

Element/Group Name	Description	Max. Length in characters
<Transaction>	Group element related to Transaction	N/A
<TransactionStatus>	Numeric code that indicates the status of the transaction.	4
<TransactionMessages>	Message associated with the transaction code returned above.	75

Possible Values for <TransactionStatus> and <TransactionMessages> are listed below:

<TransactionStatus>	<TransactionMessages>
0000	The XML File is invalid
0001	Not a Valid User or the UserID and Password is Incorrect
0002	Not a Valid Duns Value or missing a Duns Value
0003	Success
0004	Transaction Failed

Sample ORCAXML Response File with Transaction Information:

```
- <ORCAXMLResponse version="1.0" xmlns="">
- <Transaction>
  <TransactionStatus>0003</TransactionStatus>
  <TransactionMessages>Success</TransactionMessages>
</Transaction>
+ <SearchResults>
</ORCAXMLResponse>
```

2. Search Results

This section is comprised of all the ORCA data that the user requests. It is optional, and depends on the transaction information mentioned above. The first

group within SearchResults section is <Record>. For every ORCA record returned in the transaction there will be one instance of this group which encapsulates all of that record's data. <Record> group consists of another group <RecordDetails> and an element <RecordID>. Their descriptions are as follows:

Group/Element Name	Description	Max. Length in characters
<RecordID>	A number that uniquely identifies a record.	N/A
<RecordDetails>	Consists of groups and elements related to the record.	N/A

Important Note:

RecordID is to be used by client parsing programs only to uniquely identify a record when multiple records are returned as part of "Archived only" or "Current+Archived" record request.

Sample ORCAXML Response with Record ID

```
- <ORCAXMLResponse version="1.0" xmlns="">
  + <Transaction>
  - <SearchResults>
    - <Record>
      <RecordID>999999999</RecordID>
      + <RecordDetails>
        </Record>
      </SearchResults>
    </ORCAXMLResponse>
```

The data within <RecordDetails> group is two other groups.

Group/Element Name	Description	Max. Length in characters
<GeneralInfo>	A group that consists of elements/groups that provides General Information about the vendor.	N/A
<FARProvisions>	A group that consists of data for all the FAR provisions that are included in ORCA record.	N/A

```
- <ORCAXMLResponse version="1.0" xmlns="">
  + <Transaction>
  - <SearchResults>
    - <Record>
      <RecordID>999999999</RecordID>
      - <RecordDetails>
        + < GeneralInfo >
        + < FARProvisions >
      </ RecordDetails>
    </Record>
  </SearchResults>
</ORCAXMLResponse>
```

a. **General Info**

General Info consists of elements that represent the basic information about the vendor at the time of submission of their reps and certs record. The majority of these elements are not part of provisions that constitute reps and certs. All elements in general info are derived from CCR except certification point of contact, certification submission and expiration date information.

Group/Element Name	Description	Max. Length in characters
<Organization>	Consists of Elements related to Organization that includes DUNS Number, DUNS Plus4, CAGE Code, Legal Business Name and Doing Business As and Operations Start Date	N/A
<Address>	Consists of elements related to address of the vendor	N/A
<ContractorCertContact>	Consists of elements related to ORCA Certification Point of Contact.	N/A
<CertRegistrationDateTime>	Date and time on which the record was submitted by the vendor (YYYY/MM/DD HH:MI:SS AM)	22
<CertExpirationDateTime>	Date and time on which the record is set to expire (YYYY/MM/DD HH:MI:SS AM)	22

Sample ORCAXML Response with General Info Group.

```

- <ORCAXMLResponse version="1.0" xmlns="">
+ <Transaction>
- <SearchResults>
- <Record>
  <RecordID>999999999</RecordID>
- <RecordDetails>
  - < GeneralInfo >
    + < Organization >
    + < Address>
      <CertRegistrationDateTime>2006/05/05 03:22:20 PM
      </CertRegistrationDateTime>
      <CertExpirationDateTime>2007/05/05 03:22:20 PM
      </CertExpirationDateTime>
    < /GeneralInfo >
    + < FARProvisions >
  </ RecordDetails>
</ Record>
</SearchResults>
</ORCAXMLResponse>

```

Organization Group consists of the following elements:

Group/Element Name	Description	Max. Length in Characters
<DUNSID>	DUNS Number of the vendor	9
<DUNSPlus4ExtensionID>	DUNS Plus4	4
<CAGEID>	Cage Code of the Vendor	5
<LegalName>	Legal Business Name of the vendor	120
<DBAName>	Doing Business As	60
<OperationsStartDate>	Business Start date of the vendor (MMDDYYYY)	10

Important Notes:

- a) ORCA application is designed based on the assumption that a vendor can submit a separate reps and certs record for each DUNS Plus4 on file with CCR. Therefore, a combination of DUNS Number and DUNS Plus4 is used as the unique key to identify a vendor. If DUNS Plus4 does not exist, a 9 character DUNS Number automatically becomes the unique key.
- b) ORCA Application uses the string that consists of the LegalName followed by "Doing Business As:" followed by DBA Name in parenthesis as the company name.
Example: Test Corporation Inc. (Doing Business As: TCI).
If there is no data associated with "Doing Business As" indicator, then the LegalName becomes the Company name.
Example: ABC Corporation Inc.
- c) Users are strongly recommended to include <GeneralInfo>/<Organization> elements as part of their request, since the DUNS Number and Company Name information are not included elsewhere.

Sample ORCAXML Response with Organization Information:

```
<Organization>
<DUNSID>123456789</DUNSID>
<DUNSPlus4ExtensionID />
<CAGEID>1X1X1</CAGEID>
<LegalName>TEST COMPANY</LegalName>
<DBAName>Test DBA</DBAName>
<OperationsStartDate>01111981</OperationsStartDate>
</Organization>
```

Address Group consists of the following elements:

Group/Element Name	Description	Max. Length in characters
<Street>	Address Line1 in the physical address	55
<AdditionalStreet>	Address Line2 in the physical address	55
<CityName>	City Name in the physical address	35
<CountrySubEntityCode>	2 Letter State code in the physical address	2

<PostalZone>	Postal Code in the physical address. Can be considered as Zip code for domestic addresses and postal code for international addresses.	35
<CountryIdentificationCode>	ISO 3 letter Country codes	3

Note: The data for elements within <Organization> and <Address> groups are derived from CCR data as of the date and time on which Vendor submits their Reps and Certs record in ORCA.

Sample ORCAXML Response with Address Group data:

```
- <Address>
  <Street>9100 Pennsylvania Ave</Street>
  <AdditionalStreet />
  <CityName>SAN ANTONIO</CityName>
  <CountrySubEntityCode>TX</CountrySubEntityCode>
  <PostalZone>782451850</PostalZone>
  <CountryIdentificationCode>USA</CountryIdentificationCode>
</Address>
```

Certification Point of Contact Group consists of the following elements:

Group/Element Name	Description	Max Length (characters)
<GivenName>	First name of the ORCA certification Point of Contact.	28
<MiddleName>	Middle initial of the ORCA certification Point of Contact.	1
<FamilyName>	Last name of the ORCA certification Point of Contact.	28
<Title>	Job Title of the ORCA certification Point of Contact.	100
<Telephone>	Telephone number of the ORCA certification Point of Contact.	10
<Extension>	Telephone extension of the ORCA certification Point of Contact.	6
<NonUSTelephone>	Non US (or international) Telephone Number of ORCA certification Point of Contact.	30
<Telefax>	Fax number of the ORCA certification Point of Contact.	10
<ElectronicMail>	Email Address	80
<Street>	Address Line1 of the ORCA Certification Point of Contact	55
<AdditionalStreet>	Address Line2 of the ORCA Certification Point of Contact	55
<CityName>	City Name of the ORCA Certification Point of Contact	35
<CountrySubEntityCode>	2 Letter State code of the ORCA Certification Point of Contact	2
<USZipCode>	US Zip Code	5

<USPostalZonePlus4>	Zip Plus4	4
<PostalZone>	Postal Code for International Address	35
<CountryIdentification Code>	ISO 3 Letter Country Code	3

Sample ORCAXML Response with Certification Point of Contact Information:

```
- <ContractorCertContact>
  <GivenName>John</GivenName>
  <MiddleName />
  <FamilyName>Doe</FamilyName>
  <Title>President</Title>

Provisions

This group - the core of ORCAXML - consists of all the provisions that make up the Reps and Certs of the vendor. Within this group, each provision is a separate subgroup and is identified by its provision number. The data elements corresponding to vendor responses are included under these subgroups. Using ORCAXML, users can either request data for all the provisions or of specific provisions of their choice. Two additional URL elements will also be included in this group to let contract writing systems download a copy of Reps and Certs in HTML or PDF format.

<HTMLURL>

Description: This element consists of a URL for complete Reps and Certs that include static text along with Vendor responses for all the provisions in HTML format. The URL expires 15 minutes after it is created.

Maximum Length (in characters): 200

<PDFURL>

This element consists of a URL for complete Reps and Certs that include static text along with Vendor responses for all the provisions in PDF format. The URL expires 15 minutes after it is created.

Maximum Length (in characters): 200

<FAR522032>

This group consists of element(s) related to vendor responses in FAR Provision 52.203-2.

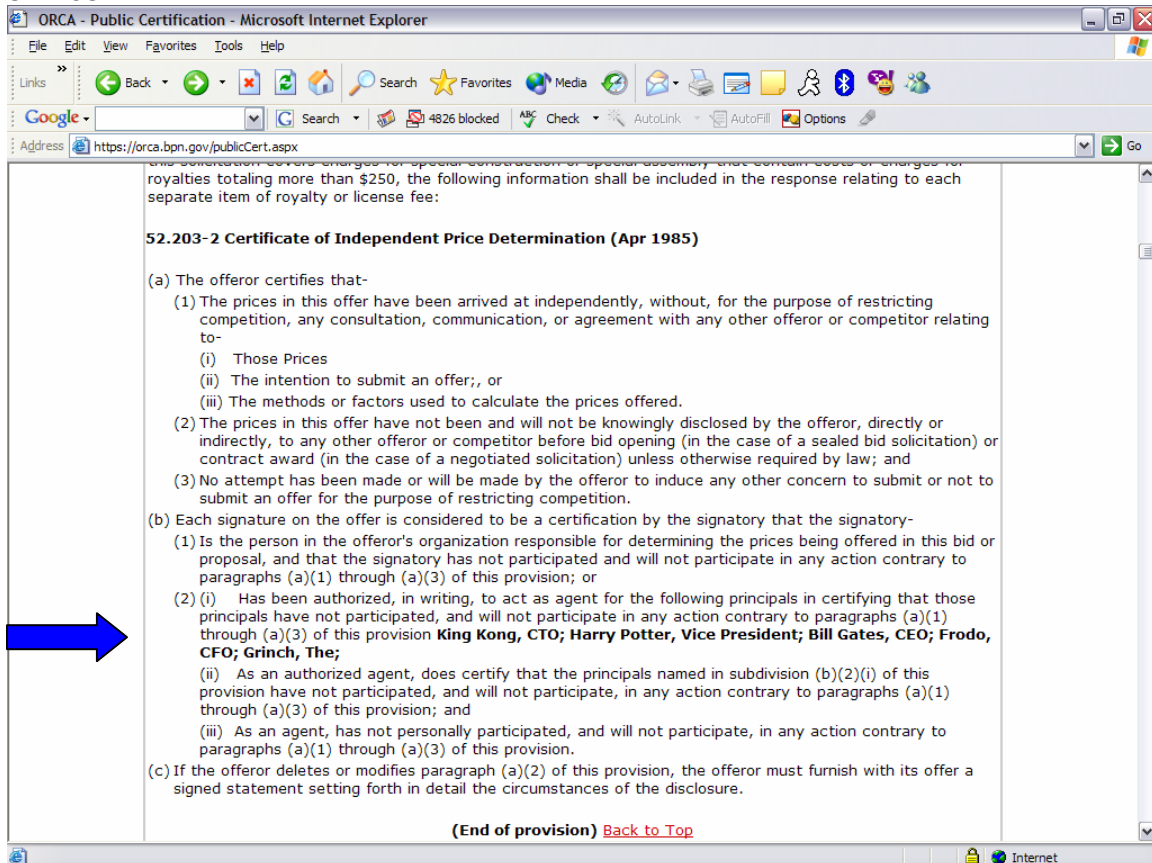

Figure 1- FAR Provision #52.203-2

This group consists of a <ProposalPricingContact> group that has <Name> and <Title> elements. These elements return data that corresponds to vendor responses in Paragraph b(2)(i) that lists Bids and proposals pricing point of contact information. The <ProposalPricingContact> group repeats for each occurrence of Name and Title elements.

52.203-11 Certification and Disclosure Regarding Payments to Influence Certain Federal Transactions (Apr 1991)

(a) The definitions and prohibitions contained in the clause, at FAR 52.203-12, Limitation on Payments to Influence Certain Federal Transactions, included in this solicitation, are hereby incorporated by reference in paragraph (b) of this certification.

(b) The offeror, by signing its offer, hereby certifies to the best of his or her knowledge and belief that on or after December 23, 1989-

(1) No Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress on his or her behalf in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment or modification of any Federal contract, grant, loan, or cooperative agreement;

(2) If any funds other than Federal appropriated funds (including profit or fee received under a covered Federal transaction) have been paid, or will be paid, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress on his or her behalf in connection with this solicitation, the offeror shall complete and submit, with its offer, OMB standard form LLL, Disclosure of Lobbying Activities, to the Contracting Officer; and

(3) He or she will include the language of this certification in all subcontract awards at any tier and require that all recipients of subcontract awards in excess of \$100,000 shall certify and disclose accordingly.

(c) Submission of this certification and disclosure is a prerequisite for making or entering into this contract imposed by section 1352, title 31, United States Code. Any person who makes an expenditure prohibited under this provision or who fails to file or amend the disclosure form to be filed or amended by this provision, shall be subject to a civil penalty of not less than \$10,000, and not more than \$100,000, for each such failure.

<FAR522043>

This group consists of element(s) related to vendor responses in FAR Provision 52.204-3.

52.204-3 Taxpayer Identification (Oct 1998)

(a) Definitions

"Common parent," as used in this provision, means that corporate entity that owns or controls an affiliated group of corporations that files its Federal income tax returns on a consolidated basis, and of which the offeror is a member.

"Taxpayer Identification Number (TIN)," as used in this provision, means the number required by the Internal Revenue Service (IRS) to be used by the offeror in reporting income tax and other returns. The TIN may be either a Social Security Number or an Employer Identification Number.

(b) All offerors must submit the information required in paragraphs (d) through (f) of this provision to comply with debt collection requirements of 31 U.S.C. 7701(c) and 3325(d), reporting requirements of 26 U.S.C. 6041, 6041A, and 6050M, and implementing regulations issued by the IRS. If the resulting contract is subject to the payment reporting requirements described in Federal Acquisition Regulation (FAR) 4.904, the failure or refusal by the offeror to furnish the information may result in a 31 percent reduction of payments otherwise due under the contract.

(c) The TIN may be used by the Government to collect and report on any delinquent amounts arising out of the offeror's relationship with the Government (31 U.S.C. 7701(c)(3)). If the resulting contract is subject to the payment reporting requirements described in FAR 4.904, the TIN provided hereunder may be matched with IRS records to verify the accuracy of the offeror's TIN.

(d) Taxpayer Identification Number (TIN).

- ☐ TIN on file with CCR.
- ☐ TIN has been applied for.
- ☐ TIN is not required because:
- ☒ Offeror is a nonresident alien, foreign corporation, or foreign partnership that does not have income effectively connected with the conduct of a trade or business in the United States and does not have an office or place of business or a fiscal paying agent in the United States; ,
- ☐ Offeror is an agency or instrumentality of a foreign government; ,
- ☐ Offeror is an agency or instrumentality of the Federal Government.

(e) Type of organization.

- ☐ sole proprietorship;
- ☐ Partnership;
- ☐ Corporate entity (not tax-exempt);
- ☐ Corporate entity (tax-exempt);
- ☐ Government entity (Federal, State, or local);
- ☐ Foreign government;
- ☐ International organization per 26 CFR 1.6049-4;
- ☒ **SMALLBUSINESS5**

(f) Common parent.

- ☐ Offeror is not owned or controlled by a common parent as defined in paragraph (a) of this provision.

52.209-5 Certification Regarding Debarment, Suspension, Proposed Debarment, and Other Responsibility Matters (Dec 2001)

(a) (1) The Offeror certifies, to the best of its knowledge and belief, that-

(i) The Offeror and/or any of its Principals-

(A) Are ☐ Are not ☒ presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(B) Have ☐ Have not ☒ within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, or receiving stolen property; and

(C) Are ☐ Are not ☒ presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph (a)(1)(i)(B) of this provision.

(ii) The Offeror has ☐ has not ☒ within a three-year period preceding this offer, had one or more contracts terminated for default by any Federal agency.

(2) "Principals," for the purposes of this certification, means officers; directors; owners; partners; and, persons having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a subsidiary, division, or business segment, and similar positions).

This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

(b) The Offeror shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(c) A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Offeror's responsibility. Failure of the Offeror to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Offeror nonresponsible.

(d) Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of an Offeror is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(e) The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Offeror knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.
